FINANCIAL GROUP

## CORPORATE SOCIAL RESPONSIBILITY

### **1. Investing in Sustainability**

We at BAO care about environmental and social wellbeing, aiming to make a positive and sustainable difference in communities in which BAO operates and invests. To achieve this goal, BAO develops long-term relationships with high impact local non-government organisations (NGOs), which directly enhance human welfare. The attention is particularly focused on the most vulnerable: children, young people and disadvantaged communities. We also work alongside other international funders to identify and support local communities by providing solutions to their social problems.

### **2. Investing Responsibly**

Our general commitment to corporate responsibility is inlaid in each investment decision we make.
